## Date <br> $\qquad$ <br> Constant Velocity Model Worksheet 4: Velocity vs. Time Graphs and Displacement

 Pd $\qquad$1. This motion map shows the position of an object once every second. From the motion map, answer the following:

a. Describe the motion of the object.
b. Represent the motion with a quantitative $\mathbf{x}$ vs. $\mathbf{t}$ graph.

time (s)
d. Write a mathematical expression that represents the relationship between position and time.
e. From the position-time graph find the displacement from $\mathrm{t}=1 \mathrm{~s}$ to $\mathrm{t}=3 \mathrm{~s}$.
f. Find the area under the velocity-time graph from $t=1 \mathrm{~s}$ to $\mathrm{t}=3 \mathrm{~s}$. What are the units of this area? Describe what this area represents.
2. From the position vs. time data below, answer the following questions.
a. Construct a graph of position vs. time.

| $\mathbf{t}(\mathbf{s})$ | $\mathbf{x}(\mathbf{m})$ |
| :---: | :---: |
| 0 | 0 |
| 1 | 2 |
| 2 | 4 |
| 3 | 4 |
| 4 | 7 |
| 5 | 10 |
| 6 | 10 |
| 7 | 10 |
| 8 | 5 |
| 9 | 0 |

b. Construct a graph of velocity vs. time.

c. Draw a motion map for the object.

d. Determine the displacement from $t=3.0 \mathrm{~s}$ to 5.0 s using the velocity vs. time graph.
e. Determine the displacement from $t=7.0 \mathrm{~s}$ to 9.0 s using the velocity vs. time graph.
f. Determine the average velocity from $t=4 \mathrm{~s}$ to 8 s .
g. Determine the average speed from $t=4 \mathrm{~s}$ to 8 s .
